| Engage the whole community in activities that support an understanding of the expression of our school’s Catholic Identity, which will in turn support future development focussed on:  
  - School structures and processes  
  - Curriculum and the wider learning environment  
  - The formation of staff to support and teach  
  - The engagement of parents, parish and the wider community  
Develop and implement opportunities for ongoing staff reflection and professional learning around the key messages of the Religious Education Curriculum.  
Develop and implement a consistent school wide approach for meditative practices in classrooms.                                      | Develop a shared and common language of learning across the school.  
We will do this by:  
  - Developing and implementing effective habits of thinking and doing for all learners in the school.  
  - Promoting student voice through engagement with learning intention and success criteria so that they can explain and understand their progress.  
We will do the above through the specific context of the English Curriculum with a focus on the specific planning and monitoring of student learning outcomes in Reading and Spelling through a Context Text Model.  
Review procedures already in place around the identification of student learning needs and develop a framework that allow for the planning of personalised learning and support of all students, thus maximising their learning outcomes and well being. | Develop a Teacher and Performance Development Program for the School  
Engage staff in the BCE Leadership Framework and make connections between the dimensions and capabilities with particular role statements. | Develop and implement a sustainability framework and plan for the school.  
Enhance school operations by improving the management of relevant school information for parents through implementation and use of the Parent Portal. |

### STRATEGIC PLAN FOR 2017–2021
Engage the whole of the community in conversations and activities focusing on the strategic directions of Our Lady of Dolours over the next five years.
